

# Keep up-to-date with QliqSoft

We are constantly working to improve the quality of our communication with our families.

While we are always available by phone, QliqSoft enables our care team to communicate with you via text about your loved one's care.

## What is QliqSoft

An app available on Android, Apple, and PC devices that offer secure, HIPPA compliant text communication.

## How to Join

An account for the resident's responsible party will be created upon move in. If you would like to add additional family members, please let us know.

Accept the email invitation from Qliqsoft and complete your profile. Next download the Qliq app from the app store. Once downloaded, tap on Qliq icon and follow instructions.

To start a conversation, search in the contact list to find the Executive Director and Resident Service Director. You can also let the care team know that you downloaded Qliqsoft and then we will contact you!
