Why Tembo Health?

75% ER Avoidance

3 in 4 cases that would usually go to the hospital can be managed at home with Tembo Health.

Thousands Saved per Visit

The average ER copay and ambulance trip costs over \$1,000.

Personalized Care

Meet with a board-certified physician who will coordinate care, labs and more.

<5 Minute Wait

See a doctor in minutes vs the average ER wait times of 2+ hrs.

Helping seniors live healthier lives – it's what we do.

98% of Families Recommend Tembo Health

Families + residents who use Tembo Health overwhelmingly recommend us! Here's why:

Health Services Designed with Seniors in Mind

We provide comprehensive telehealth services to help seniors live healthier, higher-quality lives. Our services include:

24/7 Urgent Care

No matter the time of day nor the issue, residents can have virtual appointment with a board-certified doctor within minutes without leaving the community.

Welcome Care Visits

Once signed up for Tembo Health, residents are eligible for a comprehensive medical screening with one of our world-class physicians. From diagnoses to medications to allergies, we review it all to develop proactive personalized care plans.

Health Coaching

Our health coaching program pairs residents with a dedicated Tembo Health nurse who continuously monitors their health and provides ongoing support to help them live healthier lives. Eligible residents may receive easy-to-use vital sign devices so that a Tembo Health clinician can remotely monitor their progress and, if there are abnormalities, initiate changes to their care regimen.

Coordinated, Quality Care

Tembo Health helps residents get the care they deserve when they need it and where they want it most – at home. We provide residents with:

World-Class Physicians

Tembo's clinicians trained and work at top institutions like Cornell, Harvard, Michigan, and Yale.

PCP + Caregiver Coordination

We keep primary care physicians and community teams informed by sharing post-appointment notes, including prescriptions + care recommendations.

On-Site Lab + Diagnostic Services

When a resident needs an x-ray or bloodwork, they often need to travel to the hospital or local doctor's office. With Tembo Health, our network of diagnostic partners visit the resident at the community – often on the same day.

Families Join Virtual Appointments

Simply click a link and join from anywhere; no travel is required!
